

The Six Musk-O-Tiers - White Paper

Cryptocurrencies and blockchain technology are transforming the way we view money and interact with the web. Our connected world is becoming more and more integrated with our work, socializing, playing and more. The concept of Play-to-Earn games is gaining traction and new games are being launched regularly. However, many of these games are either too complex, overly simplistic or do not offer much value.

A person who has become somewhat of a celebrity and vocal cryptocurrency supporter is Elon Musk. Renowned for Tesla and SpaceX, Musk has created a lot of hype around the world for cryptocurrencies like Dogecoin and Shiba Inu, and he even adopted a Shiba Inu dog which he called Floki.

With his regular comments and tweets, Musk has created waves in the crypto world which have led to an influx of meme crypto coins that are inspired by the Shiba Inu breed. With this in mind, we decided to take it a step further by building The Six Musk-O-Tiers series of Play-to-Earn games.

One of the key characteristics of blockchain and decentralization is that it is putting control back into the hands of the people. Social communities are an essential component of humanity and online communities are developing rapidly thanks to technology and the emerging metaverse.

One of the central themes of decentralization and the communities that are developing is the shift from being reliant on governments and monopolistic corporations. Decentralization is becoming a driving force behind creating social equity, fairness, responsibility and empowering communities to take care of and support each other. This is why the slogan of The Six Musk-O-Tiers is...

All for One & One for All!

The Six Musk-O-Tiers Games

Each Six Musk-O-Tiers game will be a multi-level, Play-to-Earn game. There will be a total of 6 episodes in the series with the first episode being: **Let's Get Floki**. There are 6 tiers (levels) in the first episode and the difficulty increases with every tier.

The objective of the game is to overcome the challenges in each round by using the unique powers of the characters and collecting in-game coins. The Six Musk-O-Tiers characters are Griffin, Xavier, Damian, Kai, Saxon and X Æ A-12. At the end of each level, the coins collected by the player will be converted to **MSKO** tokens and transferred to the player's crypto wallet. **MSKO** tokens can then be traded or exchanged for other cryptocurrencies or fiat currencies through various crypto exchanges that will have **MSKO** listed.

Let's Get Floki Storyline

Elon has 6 children and a dog called Floki. One day, Floki goes to explore the SpaceX Starship but accidentally initiates a launch and is blasted into space. The Six Musk-O-Tiers must then spring into action to help bring their beloved Floki back to earth safely.

Gameplay

This fast-paced, action-packed game requires smart thinking and quick reactions to make your way through the 6 tiers that increase with difficulty. During each stage, players must utilize the unique powers of each Muskotier to complete the challenges. Combining the powers of the Muskotiers increases their overall abilities and allows players to advance faster and further.

During each tier of the game, players must collect in-game coins. Upon completing a tier, all coins collected for that round are then banked. The higher the tier, the more coins there are available to collect. The ultimate challenge is the final level where all 6 Muskotiers must band together and combine their abilities to save Floki and bring him back to earth safely. Should a player succeed in completing all 6 tiers, they will receive a grand prize of additional **MSKO** rewards. When the player is finished playing, the coins can then be cashed-out and are transferred automatically to the player's crypto wallet.

NFTs

To further enhance the gaming experience, players will be able to purchase NFT collectables. These will include power packs and character enhancements that give the Muskotiers additional powers and capabilities. Players will also be able to customize the various characters and purchase these modified characters as collectables using **MSKO**. Players will be able to trade their NFTs on the open market.

Technology

The Six Musk-O-tiers metaverse will be built with Unity as a web-based game that can be played with any web browser and will be accessible via desktop and mobile devices. Part of the roadmap will be to launch native Apps and a VR version. The underlying blockchain and **MSKO** tokens will utilize the Binance Smart Chain network. Based on the market adoption, there is the possibility of deploying on additional blockchain networks too, although this is yet to be confirmed.

MSKO Token

Musk'ot (a play on words of Musk and Mascot), is the token of The Six Musk-O-Tiers metaverse. The token ticker symbol is **MSKO** and it will serve various functions within the **MSKO** metaverse and ecosystem:

The Six Musk-O-Tiers – Flight Plan

December 2021

- Website launch
- Social media launch: YouTube, Facebook, Twitter
 - Launch of Telegram channel
 - **MSKO** Token private sale
 - Press Releases

Quarter 1 - 2022

- Teaser campaigns (Countdown)
 - Pancake Swap Listing
 - CMC listing
 - Launchpad
 - Public Sale
 - Mainstream marketing campaigns
- The Six Musk-O-Tiers – Let's Get Floki alpha version
 - **MSKO** NFT marketplace launch
 - Listing on additional major exchanges
- All for One & One for All leaderboards with global airdrop
 - The Six Musk-O-Tiers – Let's Get Floki beta version

Quarter 2 - 2022

- The Six Musk-O-Tiers – Let's Get Floki official game launch
 - iOS & Android app launch
 - Metaverse version allowing players to sell via NFT

The Six Musk-O-Tiers Team

The Musk-O-Tiers team is made up of a group of crypto enthusiasts, creative gurus, marketing mavericks and development prodigies. By combining our entrepreneurial spirit and passion for gaming with blockchain technology, we aim to help realize a global goal of decentralization while providing the highest levels of rewarding fun and entertainment.

Nir Miretzky

**Founder &
Head of Game Dev**

Nir is a skilled game developer and creative prodigy that has built numerous successful games and consults with gaming companies across the world.

Nadav Moshe

Co-Founder & CTO

Nadav has vast experience with online ventures, blockchain and cryptocurrencies. With his global network of connections, Nadav will over.

Shay Perry

Co-founder & CEO

Shay is an experienced entrepreneur, crypto and business development professional. Shay also has an extensive global network of contacts that he brings to the table.

Offek Kanahof

**Blockchain &
Crypto Lead**

Offek is a blockchain expert and technology mastermind. He has extensive experience building advanced solutions and is a true asset to the team.

David Bitton

Creative Director

David is a talented UX/UI designer, concept artist and web designer who has a gift for transforming concepts into creative masterpieces.

Dou Diamond
